

BASELINE'S DESIGN PURCHASED IN CENTRAL ALBERTA

OTHER CERTIFIED DESIGN PURCHASED IN CENTRAL ALBERTA

A unique, custom design for each development, carefully produced and reviewed

Very likely a standard, copied-and-pasted design for the number of bedrooms, with inadequate review and editing

WILL YOU SAVE MONEY?

DESIGN: Cost is comparable. Baseline provides equipment to excavate test pits or credits you for it

DESIGN: Cost is comparable. Homeowner is often required to provide the equipment to excavate test pits

HOMEOWNER FORM: Careful accounting for number of bedrooms, Fixture Units, and other factors for each individual project

HOMEOWNER FORM: Incorrect numbers used for number of bedrooms, Fixture Units, and other factors. System improperly designed for size of development

SOIL: Professional custom soil analysis; loading rates used for your unique site and situation

SOIL: The same loading rate numbers used for number of bedrooms. Oversized design

PERMITTING: Design information is complete and comprehensive. Receive commendation from SCOs; NO DELAYS

PERMITTING: Design information is incomplete and erroneous. Permitting delayed, perhaps several times

INSTALLATION AND PERFORMANCE: Cost of materials and installation is less. System is compliant and properly sized. Pump and other components are sufficient and function properly into future use

INSTALLATION AND PERFORMANCE: Cost of materials and installation is greater. System may not be compliant. Pump is inadequate, requiring replacement. System malfunction or failure likely
